GMA ExtremeBlast™

LIMITED RELEASE. MADE TO ORDER.

HIGHER PRODUCTIVITY | COST EFFECTIVE | SUPERIOR SURFACE FINISH | SAFER

Coarsest Grade Engineered Blend for Extreme Jobs

GMA's ExtremeBlast™ is our coarsest garnet grade engineered for the most resilient coating removal jobs. The unique blend of both coarse and fine garnet is ideal for industrial maintenance in refineries, shipyards and offshore platforms. Our angular coarse garnet removes resilient industrial coatings, and the durability of our sub-angular alluvial garnet helps sweep off remaining surface contaminants.

Throughout the world, garnet is recognized as the leading high performance, cost efficient and safe choice for a variety of blasting applications.

UNIQUE FEATURES

- Coarsest grade for removal of thick resilient coatings in extreme conditions.
- Ideal for removal of high build coatings and marine foulings.
- Strongest garnet abrasive grade.

Higher productivity

Superior cleaning rate against other abrasives.

Cost Effective

Lower garnet consumption, labour, clean up and disposal cost.

Superior Surface Finish

Exceptionally clean surface and uniform profile.

Safer

Meets all industry, government safety and environmental standards.

Major Industries/Applications

Oil & Gas (Onshore/Offshore)

Bridges

Tank Chemical Liners

Shipyards

Military

Features	Application
<p>Removal of exceptionally resistant specialty coatings, thick mill tank liners and marine foulings.</p> <ul style="list-style-type: none"> • Uniform surface profile of 90 - 110 µm • Blasting rates: Up to 28 m²/hr • Consumption rates: As low as 16 kgs/m². 	<ul style="list-style-type: none"> • Removal of 750+ microns coatings • Heavy industrial maintenance on tank liners, coal tar, heavy marine coatings and fouling • High build coating removal • Offshore platform deck coatings • TSA Removal and preparation • Ship hulls and ballast tanks.
